

CAMPAIGN BOOKS NEARLY READY

Democrats Will Be in the Field First With an Array of Facts.

REPUBLICANS ARE WAITING
WANT TO DEVOTE SPACE TO DENVER CONVENTION.

Washington, June 22.—The Democratic congressional committee is making an early start in the publication of a campaign book that is unique in the history of the party. It will be published July 1 and will consist of extracts from speeches made in congress. A book of this kind was issued by the Democratic congressional committee in 1904. It will permit Democratic speakers to inform themselves very early on issues that are regarded as of most importance by the committee. Later on the committee will issue an additional book containing additional material.

REPUBLICAN BOOK AUG. 1.

Much Space Will Be Devoted to the Injunction Issue.

Washington, June 22.—The Republican congressional campaign book will be out unusually early this year, probably six weeks sooner than it was issued four years ago. The book is practically corrected up to date on such matters as can be handled before the Democratic convention meets. It is customary to reserve a portion of the book for comment on the action of the Democratic convention and to include the Democratic platform for the information of campaign speakers. The book will follow quite closely along the lines of the last campaign book, except that some new issues will be introduced and others that have passed to be of interest will be dropped.

Much Space on Injunctions.

Considerable space will be devoted to the question of injunctions. There will be biographical sketches of the various candidates, and the work of the Republican congress will be given fully, particularly of the last three sessions.

At the latest the book will be issued Aug. 1. This will give campaign speakers an opportunity to be prepared for an early opening of their work wherever that is desired. The committee is planning its work with the idea that this year, more than ever before, the campaign will be waged by means of literary productions through the press and pamphlets and by speeches and by the active work of spellbinders. For that reason the early issuance of the campaign book has been regarded as especially desirable.

Branch Office in New York.

Washington, June 22.—The Republican congressional committee has arranged to have a branch office in New York city, which in fact will practically be the headquarters of the committee, although technically the headquarters will remain in this city. The New York office will be on the fifteenth floor of the St. James building and will be opened Aug. 1. It is there that the officers of the committee will spend most of their time, and from that office much of the literature will be circulated. The bulk of the frankable literature will be distributed from this city.

Many Replies Received.

Washington, June 22.—The Republican congressional committee has been overwhelmed with replies to its offer to pay \$150 for the best article, not exceeding 1,000 words, on the question, "Why the Republican Party Should Be Successful Next November." About 500 replies have already been received, although the offer has been only three weeks open and does not close until after the Democratic convention in July.

POUCH FOUND IN PATCH OF WEEDS

Kansas City Mail Robber Overlooked Diamonds Valued at \$100,000.

LAWYER AIDS IN ESCAPE
POLICE HAD THE THIEF BOOKED FOR INVESTIGATION.

Kansas City, June 22.—The registered mail pouch which contained \$50,000 in money and \$100,000 worth of diamonds and jewelry, stolen from a mail car at the Union station here on the night of June 6, was found this afternoon by a switching crew in the yards of the Rock Island railroad in Kansas City, Kan. The pouch still contained a number of valuable articles of jewelry, but four empty envelopes which had contained the \$50,000 in currency showed that the thief had made good on the smaller part of his haul.

Mysterious Theft.

The theft of the mail pouch was very mysterious. The pouch was consigned from Los Angeles to New York city and contained in addition to the valuable diamonds and jewelry, \$50,000, being sent to a New York bank. Receipts were shown for it all the way from Los Angeles to Kansas City, where the pouch was lost sight of. Government agents from Washington were hurried here and one of the most extensive searches ever made by the department has been conducted.

Slipped Through Hands of Police.

The case of the stolen pouch was made still more notable by the fact that the thief slipped through the hands of the Kansas City police force. Early on the morning of June 7 detectives arrested a negro loitering in Union avenue, near the police station and booked for investigation. The desk sergeant, when searching the negro, took \$10,000 worth of jewelry from his person and \$500 or \$600 in currency. Shortly after being locked up the negro sent for an influential attorney of Kansas City and told him that he would give \$200 if he was freed by police court in the morning. The attorney had the charge changed from "loitering" to "violation of the law," and the next day, being no other charge against him, he was ordered to leave town.

Traced to Denver.

Two days later the federal authorities issued photographs of a negro known as Charles Stephenson, and under various aliases.

The picture proved to be an exact likeness of the negro. Federal authorities immediately struck the negro's trail and traced him to Denver, where the search was apparently dropped.

A reward of \$2,000 has been offered by the government for his arrest. Postoffice officials tonight refuse to divulge the value of the jewelry recovered, but it is believed that almost all of the original shipment was intact in the pouch.

Found in Patch of Weeds.

The pouch was found in a patch of weeds near where from ten to twenty switch engines pass each day. Railroad men tonight say that for several days they have spoken of that white patch of something, and it became rather a joke among the switchmen. Today while his train was passing, William L. Louth, a switchman, jumped out and investigated. The envelopes, out, apparently by a paper knife, lay in a stack by themselves. The pouch was some feet distant, and when Louth began to rummage in it he extracted a number of packages unopened and untouched. It was apparent that the negro was unaware of the value of the stuff he overlooked.

The unopened packages were immediately handed over to the federal authorities.

A Lesson in Health.

Healthy kidneys filter the impurities from the blood, and unless they do this good health is impossible. Foley's Kidney Cure makes sound kidneys and will positively cure all forms of kidney and bladder disease. It strengthens the urinary system. F. J. Hill Drug Co., "The Never Substitutes."

ONE A YEAR.

Madrid, June 22.—A son was born to Queen Victoria of Spain tonight.

Queen Victoria, formerly Princess Ena of Battenburg, and King Alfonso were married at Madrid May 31, 1906. Their first son was born May 19, 1907.

SEVEN DEATHS FROM THE HEAT

In Addition a Mad Dog Scare Spread Through the City of Chicago.

Chicago, June 22.—The hottest day of the year, with the mercury standing at 94 degrees, brought death and suffering to Chicago. Seven deaths were reported to the coroner's office and heat prostrations were numerous. In addition, a mad dog scare spread throughout the city and the chief of police ordered his men to shoot all unmuzzled dogs. A similar order issued in Morton Park, a suburb, resulted in the killing of forty dogs in a few hours.

List of Victims.

The death list today follows:
Frank Cass, 35 years old, overcome while working in his garden at LaGrange, a suburb.

Samuel Douglass, 25 years old, negro; made dizzy by heat and fell off yacht into Jackson park lagoon, drowning before aid could reach him.

John Golden, drowned in Desplaines river while seeking relief from heat.

William Hobson, 55 years old, dropped dead of heart disease, superinduced by heat.

Baby Gunther, 2 weeks old, died at county hospital of heat prostration.

Sarah Oskmos, 9 years old, died at Presbyterian hospital after heat prostration.

Estelle Eley, 13 days old, died at county hospital of heat prostration.

Many Prostrations.

The number of prostrations reported to the police totaled several scores. The most serious of these included the cases of James Burden of 344 One Hundred and Fourth street, New York City, who came here to attend the Republican convention, and of Mrs. Mary Brown of 634 Bishop street, Chicago, who was overcome while sitting at a second-story window and fell fifty feet to a paved courtyard, suffering internal injuries which may cause her death.

Mad Dog Scare.

The mad dog scare was due to the unusual number of attacks made by vicious canines within the last few days. Chief of Police Shipley said today that ten cases had come to his notice since Friday and he sent out a general order that all unmuzzled dogs should be killed. Thus far none of the persons bitten has developed symptoms of rabies, but all are being watched by the health department officers.

The thermometer reached 94 degrees at 1 o'clock today. According to the local weather bureau, only one other city, El Paso, Texas, showed a higher temperature during the day, 95 degrees being reported from there. A continuance of the hot wave is expected tomorrow, but by Wednesday showers and a shift of the wind from the southwest to the northwest are expected to bring relief to that section of the country.

Many Prostrations.

New York, June 22.—A severe heat wave, which has enveloped the eastern states for three days, prostrated over a score of persons in and about New York today. No change is promised for several days, but the weather bureau and hospitals are preparing to handle any number of heat cases tomorrow. All New York and its environs suffered today and tonight. There was little reduction in the temperature, which reached a maximum of 86 degrees at the weather bureau at 1 o'clock today. Should the heat continue the public parks will be thrown open to all who wish to sleep on the lawns.

CUTLER MAKES ANNOUNCEMENT OF CANDIDACY

Continued From Page 1.

At length, the legislatures of 1905 and 1907, on the recommendation of the governor, passed a measure providing for the building of a reservoir to handle the water of the reservoir and grant fund to corporations or associations within the state, for the construction of reservoirs, whether public or private. The measure was passed by the legislature in 1907, and the construction of reservoirs for agricultural purposes. This is a good beginning. Now the legislature should permit the entire reservoir fund, which will be about three-fourths of a million dollars when all the land is sold, to be used for building reservoirs and for dams of irrigation companies for building reservoirs, so that our young men as they grow up will not be paying out thousands of dollars to Canada or Mexico or even to other states to make homes while we have land and water in Utah, requiring only the capital now in the hands of the state to establish homes for our children for many generations. The repayment of 10 per cent of this cost of the year makes it possible to keep the fund in perpetual use for the purposes set forth in the law.

Agricultural Development.

"The prosperity of the state depends on its agricultural development as much as on any other thing. And it is suicidal while we are paying out thousands of dollars yearly to bring immigrants into the state, to allow so many of our boys to leave the state because they cannot get water for the land. With the development of dry farming, the state should experiment, wherever it looks feasible, for the boring of wells for water for culinary purposes, on or near the great tracts of arid land now being brought under cultivation. If the necessary scientific fertilizers will produce good crops I pledge myself to the accomplishment of these and other worthy objects."
"June 22, 1908. JOHN C. CUTLER."

THE DEATH RECORD.

Brig. Gen. Albert Hartsuff, Retired.
Detroit, Mich., June 22.—Brigadier General Albert Hartsuff, U. S. A., retired, died suddenly today from heart disease. He was a brother of the late Major General George Hartsuff and the late General William Hartsuff.

He served in the medical department during the civil war and aided in putting down the yellow fever epidemic at New Orleans at its outbreak, and then went west and took a prominent part in a number of Indian campaigns.

Robert B. Shelton.

Kansas City, June 22.—Robert B. Shelton, cashier of the Citizens' State Bank of Mountain Home, Ida, died here today, where he had come for treatment.

NINE NEGROES DONE TO DEATH

Hemphill, Sabine County, Tex., Scene of Wholesale Lynching.

EXCITEMENT RUNNING HIGH
BOTH RACES HAVE ARMED AND CLASH IS IMMINENT.

Houston, Texas, June 22.—Last night nine negroes met death at the hands of a mob in the vicinity of Hemphill, in Sabine county. Today both races secured arms and the tension is such tonight that a race clash appears imminent.

The Dead.

Jerry Evans, aged 22.
Will Johnson, aged 24.
Mose Spellman, aged 21.
Cleveland Williams, aged 27.
William Manuel, aged 25.
Frank Williams, aged 22.
Two unknown men.
William McCoy.

All Negroes.

All the dead are negroes. The lynchings followed the killing of two white men by negroes. Two weeks ago Hugh Dean and several other white men visited the negro church and schoolhouse, where a dance was in progress, presumably in quest of liquor, it being the custom of some of the negroes to sell whisky during the progress of such affairs.

During the evening Dean was killed and six negroes were held for the killing. At the preliminary hearing the evidence tended to show that the plot was formed at the dance to kill Dean.

Farmer Assassinated.

Saturday last, Aaron M. Johnson, a prominent farmer, was assassinated while seated at the dining table with his wife and child, the bullet being fired through a window. For this crime Perry Price, a negro, was arrested, and it is stated, confessed, implicating Robert Wright, a relative of one of the negroes held for Dean's murder. Price declared he was offered \$5 to kill Johnson.

Five on One Tree.

Then followed the forming of a mob last night, the overpowering of the jailer at Hemphill, and the lynching of the six negroes held for the murder of Dean. Five were hanged to the same tree, while another attempted to escape and was shot to death. Later in the night William McCoy, another negro, was shot and killed while standing at the gate of the Johnson home, and this morning the bodies of two more negroes were found in the creek bottom. Wright, the negro who confessed to killing Johnson, and the man he implicated, were taken to Beaumont for safe-keeping under guard of the military company of San Augustine.

Sabine county is situated in the most remote part of the eastern section of the state, with sparse railroad and telegraph facilities.

IRRIGATION UP IN IDAHO

Possibilities of Portneuf Valley Investigated by Engineers of Reclamation Service.

(Special to The Herald.)

Washington, June 22.—Preliminary investigations have just been completed by engineers of the reclamation service of the irrigation possibilities of Portneuf valley, in the vicinity of American Falls, Ida, and of the feasibility of diverting the waters of the Blackfoot river into Portneuf drainage. It is believed that about 30,000 acres lying partly in the Fort Hall reservation, south of Portneuf, and east of Snake river, can be served with water from Portneuf river. There also exists a small tract of land north of Pocatello which lies above the reservation ditch and which can be reached by canal out of Portneuf river, diverted a few miles above Pocatello. Another tract of fine irrigable land of about 40,000 acres in the vicinity of Chesterfield could probably be irrigated by diverting the waters of Blackfoot river into Portneuf drainage, and as these lands lie well above the stream all the drainage would revert back to the Portneuf for use below. A small tract could also be irrigated on the Blackfoot on the canal, which would convey water through the divide. Portneuf river could be used as a channel for waters diverted from the Blackfoot river, and from it water could be diverted at will.

The settlement of Chesterfield was established about twenty-five years ago, but the scarcity of water forced many settlers to abandon their places, either selling at practically nothing or renting for pasture. Owing to the present condition of the reclamation fund it is extremely doubtful if the reclamation service will be able to assist in the construction of this work, but if it is found feasible and the cost reasonable, settlers may be able to organize and do the work themselves. The water supply is controlled by the Indian office.

THREE RIVERS, QUEBEC, ABLAZE

Greater Part of the Business Section of the City in Ruins.

LOSS IS OVER ONE MILLION
WOMAN AND TWO CHILDREN BADLY BURNED.

Three Rivers, Quebec, June 22.—Fanned by a high wind, a fire which broke out shortly before noon today in a stable, was not checked until the greater part of the lower town, containing the business section of the city, had been consumed. Then, with the assistance of firemen summoned by special trains from Montreal, Quebec, Sherbrooke and Grande Mere, it was held in check. Almost every building of any consequence in that section of the city was destroyed, including the postoffice, the city hall, every hotel worthy of the name with one exception, the fine building of the Hotel de la Gare, and most all of the leading stores. Over 300 buildings were burned. The narrow streets of the town and the inflammable nature of many buildings rendered the task of the firemen an almost impossible one.

Soldiers Fought the Flames.

Outside the town is located the camp of the Sixth military district, and soon after the fire started a thousand men were sent to help fight the flames. The local brigade was entirely ineffective when it came to coping with a conflagration, and the soldiers rendered the best assistance they could, but their bucket brigade was not equal to the task. The fact that there was no efficient command also mitigated against their efforts, and it was not until nearly four hours after the fire had assumed threatening dimensions that organized fire-fighters from the other cities was available.

Buildings Buned.

Among the buildings burned besides those mentioned are the St. James Anglican church, the oldest Anglican church built in Canada; the German Catholic parish church, Drolet, La Landan & Co.'s department store, the Dufresne, Windsor, Dominion and Richelleu hotels, the telephone office and the Bell Telephone company's exchange. The loss to the city is estimated over a million dollars. So far no loss of life has been reported, but a woman and two children are reported to have been badly burned.

BUSY TIME FOR MR. TAFT AT YALE

Continued From Page 1.

"I am glad the next president of the United States is to be a lawyer, a lawyer who knows the constitutional limitations of the executive and the other branches of government. Mind you, I do not say who that lawyer will be."

Just as Mr. Spooner sat down, Secretary Taft entered the dining hall and was greeted by Dean Rogers, while the alumni gave the Yale cheer with nine "Tafts" on the end. Mr. Taft sat down and listened to the address to the younger alumni and the seniors by Judge Proctor Clark, '78, of the appellate division of the supreme court of New York.

Address of Mr. Taft.

After the applause which greeted him had ceased, he said:

"Thirty years ago a band of young fellows in Yale took a pledge that they would stand by each other. Two or three weeks ago I received a letter saying that two or three of the men were under a load and it was the business of every '78 man to come in and help. Had I known that John Proctor Clark was going to be here I should not have come in. I expect to have something enough without hunting for it. Judge Clark has spoken eloquently and given you young men substantial instructions in practicing law. Possibly I could add something to it.

"He suggested that when you have a woman as a witness to lead her along easily. I would add to let the woman alone. And the more ignorant the woman the more certain this advice should be taken, for I have seen a woman who could not spell her name put a pretty brainy lawyer to flight. There is something about the intuition of a female, especially on cross-examination, that leads her to always give you information that you do not want, with the result that she is invited off the stand as soon as possible.

Lawyer Needs No Advice.

"Judge Clark told you to go out into the world and get at facts, when you have a case to get right down to the actual conditions surrounding the facts. I rather think it depends upon the person. I do not think a lawyer needs to be advised. An office without clients is not likely to be conducive to keep him there; he is likely to get out on his own initiative and get into touch with people and things. I began with slight legal education and was made aware of my deficiencies early. If there are defects in one's early training it is difficult to overcome them. You young men are learning the science of the law which many of those who have preceded you found it hard to acquire. I urge you not to give up study of that science of law. Following the discussion of cases in law reviews, read the decisions of cases by the courts and the decrees of the United States courts, and apply your knowledge to a thorough way. The days you pass in contemplation of the walls of your office waiting for clients to come are days which should be made of value. In these days you ought to lay the foundation of the years of successful practice. Another thing in the practice of the law to pursue is the principle of well, what I shall call the 'get there maxim.'"

Defective Administration.
"The administration of criminal law of the country is defective. Members of the bar do not recognize that their duty is not only to the court, but to their clients at large. A lawyer is not justified in resorting to the tricks of the trade to get a case. The man sitting beside him is his client. We are having a general moral awakening, and the members of the bar need that awakening just as certain as men in other walks of life. We cannot afford to sacrifice everything for success, nor permit loyalty to a client to carry one beyond the line marked by duty to the court. If you have opportunity to take criminal cases, to become a prosecutor, take them; for criminal law develops recognition of the

Importance of facts. I venture to say that when presentation of facts is needed the men who have had experience in criminal cases show greater skill.

"I am glad to have this opportunity to speak to you. Because we have been out thirty years, we must not forget that we have a great deal to learn. Take the case of Judge Clark in preparing your cases: sit up nights and prepare your statement of facts, put it in plain language, and I know you will reach the heart of the court. I know that I must have reached the heart of Justice Blatchford, when as solicitor general I rose and asked to have dismissed forty Chinese appeal cases. The judge wrote me a letter, praising my prompt disposal of the cases, and assuring me that the future was opening for me."
